

SDG Indicator 2.4.1 - Sustainable Agriculture

© CIAT/Georgina Smith

This course has been developed to support countries in the analysis and reporting for Indicators 2.4.1 of the 2030 Sustainable Development Goals (Proportion of agricultural area under productive and sustainable agriculture), and to facilitate the understanding of the main concepts underpinning the methodology.

 2.5 hours

 Available in English

You will learn about

- The concept of sustainable agriculture and the importance of SDG Indicator 2.4.1
- The key features of the Indicator, with a focus on its 11 themes that span economic, social and environmental dimensions
- The use of the farm survey and alternative options for data collection
- The methodology for analyzing, computing and reporting this SDG Indicator

Who is the course for?

The course is primarily intended for those who play a role in data collection, analysis and reporting for SDG Indicator 2.4.1, including agronomists, statisticians, enumerators and data analysts, as well as policy makers and people with an interest in the process.

Key partners

This course is part of a series on Sustainable Development Goal indicators, developed by the Food and Agriculture Organization of the United Nations (FAO) to support countries in the collection and analysis of statistical information for those SDG indicators for which FAO is custodian UN agency.
